## jodie louise cooper(31/10/1996)

shout to the hart and your too late u gave love a bad name do do do

# Crazy

call me crazy  
call me insane  
shout at me and hurt me,  
add to the pain  
hit me when im down  
stamp upon my smile  
make me so depressed and low  
just a waste of time  
you can say these things  
you can make me sad  
but you wont make me break  
its to early to be seeing you dad  
some times I long to be there  
up in the heavons with you  
but until then ill carry on  
and slowly hurt myself up in my room

# Get Better

blood pulsates  
you are the winner  
no calories today  
you have to get thinner

your unhappy today  
staring down at the box  
make some co-codamol  
no lets have lots

old habits die hard  
but the pills help to sway  
you refuse to see the problem  
as long as you make it through the day

now its a continuous head rush  
to put you on your knees  
my tears flow for you  
dont die on me i beg you please

each pill is a scar  
remember old habits die hard  
so blank out once again  
you wonder why im scared

your on all fours now  
i am no pretender  
i beg you to stop  
please babe surrender

dont leave me alone  
what have i told you  
let those pills go now  
so i can hold you

you promise to love me  
was that a lie  
because babe i love you  
so you cry and inside i die xxxxxxxxxx

# I Just Need Love

i hurt and its confusing  
i just want someone to hold me  
im alone in the dark  
please come and find me

i dont want to be alone  
i need someone to hold  
i need my heart warming  
i cant just stay cold

some one please find me  
im scarred and so alone  
cradle me in your arms  
i never want to go home

please hold me till it ends  
i dont want to dissapear  
just hold me till its over  
and we're no longer here

i dont want to do wrong  
so lock me up  
with they key to my heart  
and the ending to this book

# Its A Secret

hush baby girl  
play inside when you feel rain  
but it has to be a secret  
or you will loose the game

shush you cant tell off me  
people will get so mad  
they will send me away  
youll be ever so sad

shush little angel  
i poured a drink for you  
it astes a little funny  
but i will let you have two

you look so scarred  
little girl i do love you  
this is still a secret  
between me and you

so hush baby girl  
ill leave you to sleep tonight  
ill tend to your night mares  
when you wake up full of fright

# Life Is A Lane

I feel the earth below me  
like a pillow under my head  
no knives no guns or russian roulett  
just the pills and vodka instead

the bottle lays so empty  
the lid has been unscrewed  
what did i do to myself  
what oh what did i do

never again will i shout in pain  
never again will i scream in vain  
never moving no longer speaking  
i hear hells door is creaking

i danced with the devil  
i bellowed out his name  
i did this to myself  
because i couldnt play the game

deep oh so deep  
the blood runs oh so thick  
deeper now you can do it  
after your final hit

the pain that will never get better  
is the pain when i said forever  
but i didnt stay forever  
i just couldnt face the weather

so my body lays cold  
my lips blue  
i did this to me  
so i could let go of you xxx

# Prison Boy

prison boy are you lonley  
is that why you hang your head  
do you dream of freedom  
staring out from the bars that surround your bed

prison boy ended his life  
his cell mate pressed the bell  
prison boy died alone  
now they lay black roses in his cell

dig a hole and dig it deep  
burry me in the sand  
lay notes and flowers by my feet  
take me away from this tourtured land

well the prison boy  
decided on that life  
thats why they found him cold and lonley  
hung from the rusted window bars in the dead of night.

# Shush Baby Girl

shush baby girl  
sleep tight tonight  
as your life will spin and twirl  
you will be alright

dont think of the secrets  
dont think of the past  
dont think of your pain  
and how long it will last

look forward  
look away  
sit tight  
let the music play

you will sit day by day  
as the pills help to sway  
your life of dismay  
but it will never go away.

well i say that is a lie  
i say that is so un true  
because i think the only person  
doing this to you is you.....

# The Poison That Destroyed You! ! ! ! !

go ahead again  
reach for the bottle  
and mabe if you drink enough  
you wont wake up tomorrow

theres no point in you now  
nobody loves you  
i know you hear what they say  
and i know this will destroy you

we told you once and then twice  
we told you to stop you were a mess  
you said you was fine  
but now you live to regret

i knew you was pushing it  
i knew she didnt love you  
i knew you would be destroyed  
but we did try to help you

you were once bullet proof  
you were once my dad  
now your stumbling in the gutter  
looking for the life you didnt grab

it hurts me when you hurt  
and i cry when you cry  
but i dont drink when you drink  
and i will not cry when you die

# The Unsuspecting Mind

say hello to suzie  
and say goodnight to Anna too  
say sleep tight to baby Emilie  
and goodbye to Tommy blue

suzie is a teenager  
shes oh so pretty too  
but she cries alone at nigh  
wondering how shes gunna pull through

Anna is only six years old  
she dosnt know whats going on  
but the people found out in the end  
because she told her mum

Emilie is just a baby  
brought by candle light  
born in an alley way  
whilst her mother left and wrapped her tight

Tommy blue does not exist anymore  
he was 12 years old  
he was hurt by his parents  
and there was no one that he told

all of these kids  
only exist because of the pain you hide  
by coming up with others as bad as you  
you think your pain will subside.....

## Well We Could.....

we could cut deeper  
we could dropp to the floor  
we could cry to our selfs  
beliving theres nothing more

we could just give in  
when all hope is gone  
and we could write a letter  
saying goodbye to everyone

but we could stick together  
we could fight it  
or we could be the dynamite  
we could go and egnite it  
we could give in  
we could just dropp an die  
or we could live for each other  
forever by eachothers side

## Wierd Lol

When it hurts to smile  
and you refuse to see truth,  
mabe you are the liar born to see destiny  
and when it hurts you to live  
you hurt yourself on the outside  
so you can mask the pain you feel in your head  
to smile feel the pain  
but carry on with what you have to do so you can stop  
you can stop once and for all yet go as you mean to carry on xxxxx
