Confused

Some days you are here.

Some times not, you are me and I am you.

When you are here im angry, when you are not im lonely.

There reasons for who I am.

That I can't explain.

If you Were me, You would know.

I Don'T Know

You were a heart, and I was half of the heart. I am like a tear that falls down your face. I shatter into a bunch of pieces. You feel pain, that you seen in my eyes. When I try to make a sound, you ignore it. Because you put a big gap between us when you left me. I feel like I'm in different shades of color. When you are around, you don't look at me. you just point and use hurtful words. And after you were done, You walk away and never looked back. All I felt was pain and sadness.

I Wish I Was With U

You were my best friend,
now you are gone from me.
Wish I was with you now,
Nobody deserves to die,
especially not you.
My whole heart went with you,
I will love you forever.

Mystery

you are much better than this, than I am. I won't miss you because of this. But I will Remember beside you, I really miss your hair in my face. you are everywhere I go. what I see through your eye is this. We grow apart each day even you speak as little too me as happens now? We will never know because it, s a mystery to me and you.

You

I reach for you, but you never come for me. All I need is you, Im calling. show me the way, to be the last one standing. We will teach each other from wrong to right. I will show you what I can do. All I will is scream for you. All I need is you.
